

AH-1 (ACTIVE)

This versatile humbucker is designed to give you the player a very powerful pickup that at the same time is very quiet (low noise), it has a powerful crunch when you need it with clear middle tones. Its active circuits include a preamp that is powered by a 9V battery. **Please take notice and read carefully, the AH-1 is a standalone type of pickup that is not compatible with any other active pickup in our line;** its preamp contains a feature that simulates the vacuum tube to obtain the highest quality of tonal reproduction. The AH-1 is carefully made with American made plain enamel copper wire and bar type Alnico 5 magnets. The coils are wax potted for stabilization to insure the complete, clean reproduction of sound. Equipped with 4 wire leads that give the player endless tonal possibilities and calibrated for total tonal balance.

Position	Resonant Peak	Spacing	Output Level	Tone Chart:
NECK:	2.4 kHz	54 mm	HIGH	
BRIDGE:	2.3 kHz	54 mm	HIGH	

MORE INFORMATION

Type: DUAL COIL

Copper Wire: PLAIN ENAMEL

Magnet: ALNICO 5 (BAR)

Battery Life: 300 HOURS

Current Consumption: 2 mA

4 CONDUCTOR WIRE:

RED-DC 9VOLT

WHITE & BLACK-HOT
